DEPARTMENT :BCA(Computer application)

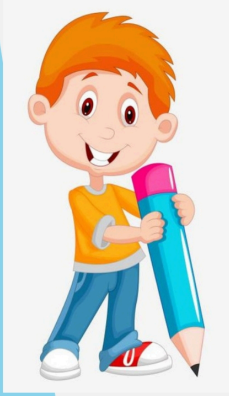
COLLEGE: COLLEGE/UNIVERSITY :Tagore college of arts and science, Chromepet-44 (University of Madras)

PROJECT TITLE

Sasi kumar portfolio

AGENDA

1. Problem Statement
2. Project Overview
3. End Users
4. Tools and Technologies
5. Portfolio design and Layout
6. Features and Functionality
7. Results and Screenshots
8. Conclusion
9. Github Link



PROBLEM STATEMENT

In today's competitive environment, a traditional resume is often limited in conveying creativity, practical skills, and interactive experience. Recruiters and clients prefer an easy, engaging, and visually appealing way to evaluate candidates.

The challenge is to create a digital platform that not only summarizes academic qualifications and skills but also provides a live demonstration of technical abilities.

My portfolio project was developed to solve this gap – to present my skills and projects in a professional and interactive manner.

PROJECT OVERVIEW

The project is a personal portfolio website that highlights my technical expertise, skills, and projects in a single platform. It is structured into sections such as About Me, Skills, Services, Portfolio, and Contact.

The website is designed with a modern responsive layout to ensure accessibility across devices, and it reflects both my personality and technical knowledge.

Overall, the portfolio serves as a professional showcase and helps in connecting with recruiters, clients, and peers effectively.

WHO ARE THE END USERS?

The portfolio is mainly designed for the following groups:

Recruiters & Employers: To evaluate technical skills, projects, and creativity quickly.

Clients: For freelance opportunities and collaborations.

Peers & Educators: To share knowledge, ideas, and encourage networking.

By targeting these users, the portfolio becomes a versatile tool for career development and professional exposure.

TOOLS AND TECHNIQUES

The portfolio was built using a strong combination of front-end and programming technologies:

Frontend: HTML, CSS, and JavaScript were used to design the user interface and interactivity.

Programming Knowledge: Python, Java, and C++ were applied for logic-building and showcasing coding expertise.

Hosting: GitHub Pages was used to deploy and maintain the website online.

These tools ensure that the portfolio is not only visually appealing but al technically strong and reliable.

POTFOLIO DESIGN AND LAYOUT

The design philosophy focuses on simplicity, modern visuals, and user experience. A blue-themed color scheme is maintained for professionalism and consistency.

The layout is divided into clean sections:

About Me

Skills (with progress bars)

Services offered

Portfolio showcase

Contact form

This structure ensures easy navigation, readability, and engagement for any visitor.

FEATURES AND FUNCTIONALITY

The portfolio includes multiple interactive features that improve usability and engagement:

Interactive navigation bar for smooth movement across sections.

Skill progress bars to visually showcase technical strengths.

Portfolio section with projects and categories.

Contact form for direct communication with clients or recruiters.

GitHub integration for direct access to code repositories.

These functionalities make the portfolio a dynamic platform rather than a static resume.

RESULTS AND SCREENSHOTS

The portfolio was successfully deployed at:
👉 yoganithi141.github.io/portfolio_yoganithi

Key results:

Professional Online Presence: An accessible digital identity for recruiters and clients.

Skill Demonstration: Visual proof of coding and designing abilities.

User Experience: Mobile-friendly, responsive, and easy-to-navigate layout.

Screenshots of different sections (Home, Skills, Portfolio, Contact) can be showcased during the presentation to demonstrate its effectiveness.

CONCLUSION

The portfolio project proves that a digital resume/portfolio is far more impactful than a static CV. It highlights skills, projects, and creativity in an interactive way.

It also provides me with a strong professional identity, helping me stand out in academic and career opportunities.
